

**FOR IMMEDIATE RELEASE**

**ISABEL GALLEGO RETURNS TO DAVID CONNER + ASSOCIATES**

*Brings International Experience To Tampa Landscape Architectural Firm*

Tampa, Florida – May 18, 2016 – David Conner + Associates (DC+A), a landscape architecture, planning, and design firm that provides design solutions to reshape our environment into safe, walkable, and enjoyable outdoor spaces, announced today that landscape architect Isabel Gallego has returned to the firm after working and completing her studies in South America.

Originally from Colombia, Gallego trained there as an architect before coming to the United States in 2005. A valued member of the team at DC+A from 2007 to 2009, Isabel then returned to Columbia to complete a Master's Degree in Landscape Architecture from Pontifical Bolivarian University in Medellín.

“We are thrilled to welcome Isabel back to the firm,” said David Conner, Principal of DC+A. “We are confident that her diverse experience and dedication to creating innovative, engaging, and enjoyable spaces is a perfect fit with our creative design team approach.”

Gallego has a rich knowledge of materials, colors and plant life common to Florida, the Caribbean, Central and South America.

“While working and studying in Colombia, I learned many things I can apply at David Conner + Associates,” Gallego said. “Being a part of the DC+A team allows me to contribute my international experiences and expand the creativity of the DC+A design team.”

Prior to returning to the United States, she was a senior designer for the award winning firm, Mesa & Uribe Paisajistas S.A.S. in Envigado, Colombia. Her design efforts include such notable projects as the EAFIT University, Medellín; and Oviedo Mall, Medellín.

**ABOUT DAVID CONNER + ASSOCIATES—**

David Conner + Associates provides design solutions that reshape our environment into safe, walkable, and enjoyable outdoor spaces. The firm includes planners, landscape architects, and urban designers who understand human movement and the interactions we have as we commute, circulate, socialize, and work.

We provide design solutions in balance with environmental systems, thereby improving sustainability, reducing maintenance and increasing value.
