

FOR IMMEDIATE RELEASE

**JESUIT HIGH SCHOOL CAMPUS RENOVATION TO INCLUDE
REIMAGINED AND REVITALIZED SPACES**

David Conner + Associates Joins \$35 Million Project

Tampa, Florida – June 3, 2016 – David Conner + Associates (DC+A), a landscape architecture, planning, and design firm that provides design solutions to reshape our environment into safe, walkable, and enjoyable outdoor spaces, announced today that it will be part of the design team for the master plan for Jesuit High School in Tampa.

Founded in 1899, Jesuit High School is a private, all-male Catholic High School originally located in downtown Tampa. In 1956, the school moved to its current 40-acre site on Himes Avenue.

Jesuit High School completed a master plan and a \$35 million fundraising effort to revitalize the campus. The private institution looks forward to the renovation of student, academic, and administrative facilities.

“We are excited to be working with Cooper Johnson Smith Architects on this prestigious educational institution in Tampa,” said David Conner, principal of DC+A.

The first phase of the renovation will feature a new Chapel, a place where students gather daily. DC+A will design a new courtyard outside the chapel, encouraging student activity and outdoor enjoyment.

“We are creating a space that will promote interaction and contemplation as well as enhance the natural and spiritual setting of Jesuit High School’s beautiful campus,” Conner added.

Completion of the project is expected in 2018.

ABOUT DAVID CONNER + ASSOCIATES—

David Conner + Associates provides design solutions that reshape our environment into safe, walkable, and enjoyable outdoor spaces. The firm includes planners, landscape architects, and urban designers who understand human movement and the interactions we have as we commute, circulate, socialize, and work.

We provide design solutions in balance with environmental systems, thereby improving sustainability, reducing maintenance, and increasing value.
